

TOMSK INTERNATIONAL SCIENCE HONOR'S PROGRAM MASTER CLASS

26-27 March 2019

Join a unique 2 full-days' workshop and lectures in

“GENE THERAPY VS. PILLS AS A TREATMENT FOR CNS DISORDERS”

During the workshop and lectures you will learn about the powerful gene-editing technology CRISPR and its application for treatment of CNS disorders; role of caffeine and cognitive enhancers in memory, attention and other cognitive functions; how you can make a transition from science to industry or even to combine them.

Professor Dr. Jos Prickaerts

Professor at Maastricht University, the Netherlands
